

PLEASE BE CONSIDERATE OF BOTH WATER AND ELECTRICITY

Mexico has shortages of electricity and water so it is important to conserve these resources even more so than you would in your own homes. We want you to feel comfortable here in every way, but please be responsible.

AIR CONDITIONING

If you are running the air-conditioning, please close the bedroom doors and windows and if you leave for the day, please check to turn off the air-conditioners and fans. Casa Lorenzo enjoys year-round, refreshing breezes, so open your windows wide and enjoy!

SHOWERS AND LAUNDRY

Hot water is limited, so please be considerate of others and shower a reasonable length of time. Towels are changed daily if needed. All towels left on the floor are replaced with fresh linens, so if your towel is not dirty consider hanging it up to dry in order to use it again as well as conserving hot water.

DRINKING WATER

Though the water in Puerto Vallarta is already purified, we have taken it to the next level by installing a 3-step filtration system, making the drinking water at Casa Lorenzo, better than most tap water in the United States.

TRASH AND RECYCLING

Unfortunately, Puerto Vallarta does NOT recycle anything at this time so all waste goes directly into the garbage. Hopefully this will change in the near future. As far as other waste, Casa Lorenzo is situated on the edge of the jungle and it is important to keep any refuse in the proper receptacles in order to avoid attracting insects.
